Motion Designer & Engineer · Vancouver, WA · theniceguynick@gmail.com · 281.794.1242

Hi Fieldguide team,

Fieldguide is making audit and advisory software feel modern, and motion is one of the best ways to make a complex, trust-heavy product easy to understand. That is the work I do every day: I ship motion for B2B SaaS and AI products, from product UI motion for an AI inference platform to a 10-piece Rive motion system that turned automation, security, and scale into one visual language. I build it production-ready in After Effects, Lottie, and Rive, and I'd love to help shape Fieldguide's motion across product, brand, and launches.
